available

Resistant to mold, mildew, and decay

Superior mechanical strength and durability

25-year limited warranty

Offered in Copper Canyon and Rustic Red

TerrainDeck has the look of real wood
without the maintenance hassle

Wood grain pattern will not repeat across the
same board to create a natural look

Use GeoRail to complete your deck system

TerrainDeck™ is a reduced maintenance deck system that has the appearance of natural wood. TerrainDeck™ is offered in two naturally beautiful colors: Rustic Red and Copper Canyon. Feature strip, perimeter board, and fascia board are available to complete the TerrainDeck image. It has the same patented formula as our other Green Bay Decking products. Our formula is the core of what makes our products a

cut above the competition. Our industry-leading, patented formula contains no wood fillers and is, in part, made from a combination of rice hulls, reclaimed paper by-product, and virgin high density polyethylene resins. TerrainDeck does not only resemble real wood, but it has an I-Beam configuration which increases its overall strength and durability. This deck system will not only create a beautiful outdoor living space, but it will help reduce substructure cost because it is rated for 16" on center (including diagonal installs).
